## RF EXPOSURE EVALUATION REPORT

FCC ID : 2AGOZ-P4LK

Equipment : Media receiver

Brand Name : facebook
Model Name : WD50JM

Applicant : Facebook Technologies, LLC

1 Hacker Way, Menlo Park, CA 94025, USA

Standard : 47 CFR Part 2.1091

We, SPORTON INTERNATIONAL INC has evaluated this product in accordance with 47 CFR Part 2.1091 and it complies with applicable limit.

The report must not be used by the client to claim product certification, approval, or endorsement by TAF or any agency of government.

The results in this report apply exclusively to the tested model / sample. Without written approval of SPORTON INTERNATIONAL INC. EMC & Wireless Communications Laboratory, the test report shall not be reproduced except in full.

Approved by: Cona Huang / Deputy Manager

### 3. RF Exposure Limit Introduction

According to ANSI/IEEE C95.1-1992, the criteria listed in Table 1 shall be used to evaluate the environmental impact of human exposure to radio frequency (RF) radiation as specified in §1.1310.

Report No.: FA952409

Page: 8 of 9

Issued Date: Jul. 15, 2019

| Frequency range<br>(MHz) | Electric field strength (V/m) | Magnetic field strength (A/m) | Power density<br>(mW/cm <sup>2</sup> ) | Averaging time<br>(minutes) |

| 1500-100,000             |                               |                               | 1.0                                    | 30                          |

The MPE was calculated at 20 cm to show compliance with the power density limit.

The following formula was used to calculate the Power Density:

$$S = \frac{PG}{4\pi R^2}$$

Where:

S = Power Density

P = Output Power at Antenna Terminals

G = Gain of Transmit Antenna (linear gain)

R = Distance from Transmitting Antenna

### 4. Radio Frequency Radiation Exposure Evaluation

#### 4.1. Standalone Power Density Calculation

| Band        | Frequency<br>(MHz) | Antenna<br>Gain<br>(dBi) | Maximum<br>Power<br>(dBm) | Maximum<br>EIRP<br>(dBm) | Maximum<br>EIRP<br>(W) | Average<br>EIRP (mW) | Power<br>Density at<br>20cm<br>(mW/cm^2) | Limit<br>(mW/cm^2) | Power<br>Density /<br>Limit |
|-------------|--------------------|--------------------------|---------------------------|--------------------------|------------------------|----------------------|--|--------------------|-----------------------------|
| 2.4GHz WLAN | 2412.0             | 1.90                     | 22.50                     | 24.400                   | 0.275                  | 275.423              | 0.055                                    | 1.000              | 0.055                       |
| 5GHz WLAN   | 5180.0             | 1.90                     | 22.50                     | 24.400                   | 0.275                  | 275.423              | 0.055                                    | 1.000              | 0.055                       |
| Bluetooth   | 2402.0             | 1.90                     | 9.00                      | 10.900                   | 0.012                  | 12.303               | 0.002                                    | 1.000              | 0.002                       |

Report No.: FA952409

Note: For conservativeness, the lowest frequency of each band is used to determine the MPE limit of that band

#### 4.2. Collocated Power Density Calculation

| WLAN<br>Power Density / Limit | Bluetooth<br>Power Density / Limit | $\Sigma$ (Power Density / Limit) of WLAN+Bluetooth |
|-------------------------------|------------------------------------|--|
| 0.055                         | 0.002                              | 0.057  |

#### Note:

- 1.  $\Sigma$  (Power Density / Limit): This is a summation of [(power density for each transmitter/antenna included in the simultaneous transmission)/ (corresponding MPE limit)], for WLAN + Bluetooth.
- 2. Considering the WLAN module collocation with the Bluetooth transmitter of the EIRP performance listed in the table above, the aggregated (power density /limit) is smaller than 1, and MPE of 2 collocated transmitters is compliant

#### **Conclusion:**

According to 47 CFR §2.1091, the RF exposure analysis concludes that the RF Exposure is FCC compliant.
